

hydroEye AI

by SpaceAge LABS

AI-based Smart Integrated Wastewater/ Stormwater Network Management Platform

FEATURES

- **User friendly** unified geospatial IoT/AI platform for integrated management
- End-to-End and modular IoT platform, both **hardware and software**
- **Integrate multiple sensor types** and data sources – level, flow, water quality, rainfall, GPS, maintenance history and meta data.
- **Alarms and Workflow** management for operations to capture and address incidents effectively
- **No code platform** for customization and remote over-the-air updates for device management
- Customized **scheduled reports** for efficient management of sensors and operations
- Enterprise suite for managing multiple customers from one platform
- **Secure and Scalable** Cloud platform

BENEFITS

- **Real-time** condition monitoring of the network
- AI-based Blockage detection to prevent sanitary and **Combined Sewer overflows (CSOs)**
- Flow monitoring for capacity and **inflow/infiltration** studies
- **Detecting pollution events** or illegal discharges through water quality monitoring
- Prevent damage of network assets from construction activities through **geofencing**
